## ABOUT

I am currently pursuing an ACS degree in Network Management from Collège LaSalle, graduating in December 2025, but that's not really how I started. In a previous life, I worked as a Full-Stack Web Engineer (and got immediately assigned to Front-End) touching from basic sites using only vanilla tech, to full-on WebApps using the SERN stack. I also love retro tech, like "woven RAM" retro, concert photography and playing the piano.

## EDUCATION

Aside from the tech stuff, not just official education but the Web Dev bootcamp, countless Youtube videos, online courses, home labs, Halo LAN parties, and such, I'm also fluent in Spanish, and I'm currently attending French classes imparted by Francisation Québec, on top of the French classes provided by LaSalle.

## EXPERIENCE

Before going back to school, in January 2024, this is what I did:

### • FRONT-END ENGINEER

PGD LATAM - from Aug 2021 to Mar 2023

Led or worked with teams in creating multiple solutions like sites in Bootstrap, jQuery, full-on web apps in React, Sass, and designed marketing campaigns and mass emails in MailChimp, for clients such as United Airlines, Wells Fargo, Zoetis, and Exact Sciences.

### • FULL-STACK ENGINEER

iComm Solutions, from Jun 2020 to Dec 2020

Collaborated on our telemedicine platform on mostly front-end work using React with Typescript, and the occasional back-end task in Go and PostgreSQL.

## SKILLS

- My degree covers the CCNA and CCNP certs, MCSA, CompTIA A+ and the LPIC. Meaning, I can deploy fully fledged networks based on Cisco equipment and Microsoft or Linux servers. I've also dabbled with Juniper, Fortinet and Netgear devices.
- Front-End tech like HTML, CSS and JavaScript, Bootstrap and jQuery, React and Sass. CMSs like Wordpress, Sitecore, SAS CDC. Dabbled in TypeScript and Angular.
- Back-End tech like Node, Express, MySQL (and derivatives). Dabbled in .NET, Python/Django.
- Other "dev checklist" tech like Git, AWS. Arduino/Raspberry Pi stuff sometimes too.
- Design and multimedia software like the Adobe suite, Logic Pro X and Cubase.
- Average typing speed of 45 WPM.
- Strong emphasis in using soft skills to drive results. Meaning, I try to be a cool dude eager to both help and chill, but I'm always a professional first.
